*Lunch Will be Provided*

## **RESPIRABLE CRYSTALLINE SILICA A Review of the New OSHA Standards**

*Presented by*

**Bryan King, Director of Corporate Safety  
Patriot Engineering & Environmental, Inc.**

The final rule on Occupational Exposure to Crystalline Silica in Construction, published March 25, 2016, established a new Permissible Exposure Limit and contained several other ancillary provisions that apply to the construction industry. Under the new standard, all obligations were to commence on June 23, 2017. To provide the opportunity to conduct additional outreach and additional time to train compliance officers, OSHA delayed enforcement until September 23, 2017. This forum will provide guidance on what steps the employers can take to ensure that they are in compliance with the new provisions when enforcement begins on September 23, 2017.

**Seating Is Limited – RSVP Early To Guarantee Your Seat!**

*\* \$15 reservation charge for non-contractor members. Not open to non-members.*

**Yes,** reserve a seat (*limit two please*) for the June Construction Safety Forum. I will call BCA at 260 483-9596 to cancel my reservation(s) if a conflict arises.
